# W

hy hide all those muscles under body hair? Show off your muscle definition with the latest hair removal technology from the pioneer and expert of body hair removal Thomas D'Esthetique. Xenon Energy System (XES) is the latest technology that promises

permanent hair removal for at least three years. Working directly on your skin, XES works to diminish and deprive nutrient supply to the cells around the glands and hair roots to permit hair to fall off naturally and permanently without destroying sebaceous glands and cells of the dermal (hair) papillas. This means that you do not have to grow your hair to the normal requirement of 2mm before the next treatment.

XES is also the only hair removal treatment that promises zero side effects like redness, abrasion, hyperpigmentation and bruises. All you experience is a painless, warm and comfortable sensation during the treatment. With XES, you are guaranteed to be free of any hairy issues.

**Men's Health/Thomas D'esthetique Promotion**  
Stand to win one of 10 Thomas D'Esthetique Hair Removal Services Voucher worth \$300 each by sharing with us your reasons for utilising hair removal services.
