

Hair Today, Gone Tomorrow

Good news: unsightly body hair can now be effectively and permanently removed, say the experts at Thomas D'esthetique.

If you've been noticing excessive hair growth on certain areas of your body, you are not alone. Many men notice unwanted hair on their chest, underarms, back, legs and even the nether region. These men sometimes find themselves the centre of attention at the beach — for all the wrong reasons.

And don't forget those painful ingrown hairs even your girlfriend's tweezers can't reach. Shaving only makes matters worse. Going to the salon to get yourself waxed isn't a permanent solution either — some have reported that they had to pay for several appointments before the root of the problem was found and addressed.

DISCOVER DLIGHT

DLight is a revolutionary light system that is able to remove hair on any part of your body. It's a proven and clinically safe method that is virtually painless. There is no downtime, and no fuss.

The secret is in the special light emitted, which penetrates deep into the skin and applies heat to the follicle as well as coldness to the dermis. This gets rid of hair without heating the skin.

RESULTS THAT LAST

In your first session, only 20 percent of hair is removed. But right after treatment, you'll notice that skin is smooth and hair-free. At this point, 80 percent of hair is still present, and will soon re-emerge on the surface of the skin.

However, the nature of this regrown hair has been changed in the process of the DLight treatment. All it takes is a few more painless treatments to completely eliminate these hairs, at their roots.

THOMAS D'ESTHETIQUE HAS THE EXPERTISE

Hair removal is a delicate job and should only be put in the hands of experts. Thomas D'esthetique is the pioneer for hair removal for men, being in the business for more than 18 years. Many satisfied customers have reported that they've been pleased with the results they've achieved in just a few sessions.
