

# Face Off

Never imagined a men's facial to be fuss-free? The Aqua Peel therapy at Thomas D'Esthetique cleanses, exfoliates, extracts and hydrates the skin minus the discomfort.

We don't always understand how a facial works. And most of what the therapist tells you eventually comes to nought midway through the massages. But if you have had a facial before, you would know that the most intense part would be the "extraction". Pores are pressed, probed and squeezed to expel the chunks of gunk trapped beneath your skin. While it clears up your complexion, there's pain nonetheless.

## Triple Action

Mens only aesthetics and wellness centre, Thomas D'Esthetique new Aqua Peel treatment does away with the pain but retains similar, if not better results. The three-step treatment begins with the Alpha Hydroxy Acid (AHA) solution that targets wrinkles and slows down the signs of aging, while firming and toning the skin. The solution is applied on the skin by way of a pen-shaped instrument. The tip of the instrument composes of three holes. As the instrument pulsates to massage the skin and apply the AHA solution, the middle hole siphons away the impurities from the skin. The treatment ends off with a moisturiser (dispensed from the third outlet) that is massaged onto the face, which is followed on by a facial mask. The cold, muddy mask provides a refreshing after feel and rejuvenates the skin at the same time. More importantly, the entire treatment provides cleansing, exfoliation, extraction, hydration and antioxidant all at the same time without the need for any intense "battering" or squeezing of your skin.

## After Glow

The Aqua Peel is suitable for all skin types, whether dry, oily or acne-prone. And it requires a first-hand experience to believe its efficacy. While the therapy may leave your face slightly red and tight, the results included an obvious natural glow on the face. Better still, the sparkle lasts beyond the treatment and the face feels fresher and rejuvenated with each passing day. The effectiveness of the treatment differs with each person as it is customised to the individual facial condition and need.

The Aqua Peel treatment is available at \$380 for a 45-minute session.
