

SMOOTH SENSATION

Hair removal is a personal affair for most men and Thomas D'Esthetique Urban Homme Salon goes the extra mile to provide a private and comfortable environment with state-of-the-art technology to get you through it quickly and effectively

Men commonly want hair removed from between the eyebrows, around the outside of the ears, and the shoulders, and also, they sometimes want smooth bodies to cut down on wind and water resistance during sports. Cyclists and swimmers remove body hair to increase their competitive speed. Many muscle builders prefer to be hairless for competitions and, therefore, carefully shave, depilate, and wax their bodies to seek the perfect body image. Thomas D'Esthetique Urban Homme Salon provides hair removal services with maximum privacy and comfort in mind so that all you need worry about is putting your best face and physique forward.

Waxing Get maximum clean smoothness with this simple, safe and hygienic process. The roller application system speeds up the waxing process for smooth waxing on the hand, armpit, chest, legs or other parts of your body.

Brazilian Waxing With every hair on your nether region removed, you're left completely smooth for a cleaner and more hygienic appearance and will last between four to six weeks. This increasingly popular method provides a smooth experience for you and your partner.

EPIL OFF Hair Removal Treatment For those who do not mind a slower hair removal process, EPIL OFF removes hair permanently by acting on hair follicles to neutralise the process of hair synthesis and formation. This reduces the rate of re-growth and makes hair weaker and thinner till it completely disappears.

Permanent Hair Removal Treatment using heat and light energy (LHE) is adjusted based on the individual skin type and hair colour to ensure maximum safety and efficacy. This results in long-term hair removal for a smooth fuzz-free skin.

B-IPL Permanent Hair Removal Tired of shaving every morning only to have a shadow after lunchtime? Biological Intense Pulsed Light (B-IPL) treatment works effectively on all hair colours and hair textures. It also removes hair from all skin types and leaves you with smooth confidence. B-IPL treatment efficiently eliminates hair from sensitive areas of the body like above the lips and under the arms, as well as large areas like the back with minimal discomfort.
